What is Research4Life?

Research4Life provides institutions in lower income countries with online access to 203,000+ academic and professional peer-reviewed content.

Our goal is to close the knowledge gap between the Global North and South, by making it easier for researchers in the Global South to access research and to publish, and as such contribute to a more equitable world of research.

ADVANCED SEARCH

Hinari- is one of the world's largest collections of biomedical and health literature.

AGORA- is an outstanding digital library collection in the fields of food and agriculture.

ARDI- gives access to scientific and technical information.

GOALI - focuses on law and social sciences, including politics, economics, philosophy, history and more.

OARE- collects information resources on environment, including ecology, geography, energy and more.

From here you can filter the information to the desired data

Research for Health

Hinari offers access to thousands of journals, books, and other information resources in biomedical and health sciences topics. The journals and books can be searched through a special version of PubMed (Medline) and through other databases.
