Content on Scopus extends back to 1788 and references date from the 1970s.

To create an account, it is sufficient to register on either Scopus or ScienceDirect, as this will grant you access to both databases.

- Use your institutional email to create an account, and you will also receive remote access.

Search Strategies in Scopus

You can use **basic search** and then filter the results, or use **advanced search** and apply filters from the start.

The image displays two screenshots of the Scopus search interface. The left screenshot shows the 'Start exploring' section with tabs for Documents, Authors, Researcher Discovery, and Organizations. The 'Documents' tab is active, showing a search box with a dropdown menu for 'Search within' (Article title, Abstract, Keywords) and a 'Search documents' button. A dropdown menu for logical operators (AND, OR, AND NOT) is open. The right screenshot shows the 'Advanced search' interface, which includes a search bar, a 'Search tips' link, and a 'Search' button. Below the search bar, there is a query string: `ALL("Cognitive architectures") AND AUTHOR-NAME(smith)`. To the right of the search bar, there is a list of 'Field codes' and 'Operators'.

Background: Hepatic artery–related complications (HARC) after live donor liver transplantation (LDLT) is associated with high morbidity and mortality rate. Methods: Prospectively maintained data from July 2011 to September 2020 was analyzed for etiology, detection, management, and outcome of HARC. Results: Six hundred fifty-seven LDLT (adult 572/**pediatrics** 85) were performed during the study period. Twenty-one (3.2%) patient developed HARC; 16 (2.4%) hepatic artery thrombosis (HAT) and 5 (0.76%) non-thrombotic hepatic artery complication (NTHAC). Ninety percent (19/21) HARC were asymptomatic and detected on protocol Doppler. Median time to detection was day 4 (range – 1 to 35), which included 18 early (within 7 days) vs 3 late incidents. Only one pediatric patient had HAT. Seven patients underwent surgical revascularization, 11 had endovascular intervention and 3 with attenuated flow required only systemic anticoagulation. All NTHAC survived without any sequelae. Revascularization was successful in 81% (13/16) with HAT. Biliary complications were seen in 5 (23.8%); four were managed successfully. Overall mortality was 14.8% (3/21). The 1-year and 5-year survival were similar to those who did not develop HARC (80.9% vs 84.2%, $p = 0.27$ and 71.4% vs 75.19%, $p = 0.36$ respectively) but biliary complications were significantly higher (23.8% vs 14.2%, $p = 0.03$). On multivariate analysis, clockwise technique of arterial reconstruction was associated with decreased risk of HAT (1.7% vs 4.1% (p value – 0.003)). Conclusion: Technical refinement, early detection, and revascularization can achieve good outcome in patients with HARC after LDLT.

To search for a source, select the "Sources" button

The image shows the Scopus website interface. At the top left is the Scopus logo. To its right is a navigation bar containing a magnifying glass icon, the text 'Search', the text 'Sources', the text 'SciVal' with an external link icon, a help icon, a notification bell icon, a library icon, and a user profile icon labeled 'LP'. A red arrow points to the 'Sources' button. Below the navigation bar is a section titled 'Start exploring' with the subtitle 'Discover the most reliable, relevant, up-to-date research. All in one place.' Below this is a horizontal menu with icons and labels: 'Documents', 'Authors', 'Researcher Discovery' (with a 'New' tag), and 'Affiliations'. To the right of this menu is a 'Search tips' link. Below the menu is a search area with a dropdown menu labeled 'Search within' showing 'Article title, Abstract, Keywords' and a search input field labeled 'Search documents *'. Below the search area are links for '+ Add search field', '+ Add date range', and 'Advanced document search >'. A blue 'Search' button is on the right. At the bottom left are links for 'Search History' and 'Saved Searches'. At the bottom center is a blue magnifying glass icon and a text box that says 'Start searching and your history will appear here. If you need help to start searching, see our [search tips](#).'

The screenshot displays the Scopus journal profile for 'Ca-A Cancer Journal for Clinicians'. The page is divided into several sections. The top navigation bar includes the Scopus logo, search, sources, SciVal, and user profile links. The main content area is titled 'Source details' and contains two primary sections highlighted with red rounded rectangles. The left section provides basic journal information: 'Ca-A Cancer Journal for Clinicians', 'Years currently covered by Scopus: from 1950 to 2025', 'Publisher: John Wiley & Sons', 'ISSN: 0007-9235 E-ISSN: 1542-4863', 'Subject area: Medicine: Oncology Medicine: Hematology', and 'Source type: Journal'. Below this information are three buttons: 'View all documents >', 'Set document alert', and 'Save to source list'. The right section, also highlighted, displays three key metrics: 'CiteScore 2023 873.2', 'SJR 2023 106.094', and 'SNIP 2023 167.948', each with an information icon. Below these sections are three tabs: 'CiteScore', 'CiteScore rank & trend', and 'Scopus content coverage'. The 'CiteScore' tab is active, showing 'CiteScore 2023' with a dropdown arrow. The main display shows '873.2' calculated from '92,555 Citations 2020 - 2023' over '106 Documents 2020 - 2023', with a note 'Calculated on 05 May, 2024'. To the right, the 'CiteScoreTracker 2024' shows '1142.7' based on '119,980 Citations to date' and '105 Documents to date', with a note 'Last updated on 05 February, 2025 • Updated monthly'. At the bottom left, 'CiteScore rank 2023' is displayed with an information icon.
